DETAILED ACTION

Claim Objections

1. Claims 1, 8 are objected to because of the following informalities:

Claim 1, line 14, after "pulse signal based on" the phrase "a setting" needs to be replaced with -- the amplitude --.

Claim 1, line 16, recites "eye-patterninged". Does it mean to recite "eye-patterned"?

Claim 1, line 20, after "unit is configured" the phrase "to be" needs to be deleted because it does not lead to positive recitation.

Claim 8, line 21, after "unit is configured" the phrase "to be" needs to be deleted because it does not lead to positive recitation.

Appropriate correction is required.

Allowable Subject Matter

2. Claims 1-15 would be allowable if rewritten to overcome the claim objections, set forth in this Office action.
3. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record considered alone or in combination with other claim limitations neither teaches nor renders obvious a pulse pattern generator comprising: a pulse generating unit which generates a pulse signal composed of a step wave varying stepwise at least at the rise or fall of the signal, a low-pass filter which smoothes and outputs the pulse signal generated by the pulse generating unit, an amplitude value setting section which adjusts the amplitude value of the step wave constituting the pulse signal so as to set the shape of the eye waveform when the output from the low-pass filter is eye-patterned according to a preset value, that enables the low-pass filter to output a pulse signal having a desired pulse pattern having a preset, predetermined eye window. Such limitations as recited in the independent claims 1 and 8 are neither anticipated nor rendered obvious by the prior art of record

Claims 2-7, 9-15 are allowed by virtue of their dependency to claims noted above.

Contact Information

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
